23 SUPERCONFERENCE TALKS YOU SHOULDN'T MISS

by: **Brian Benchoff**[7 Comments](#)

December 24, 2015

November marked our inaugural [Hackaday Superconference](#), something we've been wanting to do for a very long time. Hackaday already has a massive and vibrant online community, but until now, we haven't asked people to come together for a hardware conference that spans a full weekend. The Supercon is Hackaday incarnate, and hundreds of very cool people showed up for a few dozen talks, amazing workshops, and a lot more.

Over the past month, we've been putting together a compilation of everything that happened at the first Hackaday Superconference. This includes videos of all the talks, relevant asides, and posts for everything that happened over a two-day conference. Even if you couldn't make it out to our first con, this great material that should be shared by all.

Below is a YouTube playlist of all the talks. If you're looking for eight hours to kill over the holiday weekend, well, there you have it. After the break is the complete conference indexed by day and speaker, with links to the talk and accompanying Hackaday post.

We'd like to thank everyone who came out to the first Hackaday Supercon, with a huge shout-out to the speakers, workshop organizers, and volunteers. It couldn't have happened without the full support of the Hackaday community. That's good, because we're going to be doing this again next year.
